SPRING 2021  
CATALOG

Tree Sale Orders due Thursday April 8th, 2021 by 4:30 pm  
Plant Sale Orders due Tuesday May 25th, 2021 by 4:30 pm

# Tree Sale 2021 & COVID-19

As you know the 2020 Tree Sale was highly affected by COVID-19 and our annual fundraiser was down over 50% as compared to 2019. We hope to change that in 2021 and hope to increase our sales to normal levels. In 2021 The Conservation District office will remain closed to the public until staff have been vaccinated and we can guarantee their safety in the building. With that said, **we will not be able to take in person orders or cash orders in 2021.** We highly encourage everyone to place orders using our website as orders can be processed very easily remotely. However, we will still accept mailed in orders using check and can take credit cards over the phone for those uncomfortable with the online ordering system.

## Preferred Ordering Method Online:

[www.clmcd.org/treesale](http://www.clmcd.org/treesale)

Also accepting Mailed in orders using check and orders by phone using credit card

## *2021 Tree Sale Pick up dates and locations:*

**\*Pick-up dates & locations are subject to change due to nursery, pandemic, and weather delays**

### ***Sault Ste. Marie at Kaine's Ice Rink:***

***Friday, May 7th 12:00pm-6:00pm***

***Saturday, May 8th 10:00am-12:00pm***

### ***Newberry at Newberry Water and Light Board:***

***Saturday, May 8th 9:00am-11:00am***

***Don't miss out, order early! Some species available in limited quantities***

***Late orders will be filled if possible.***

***Orders picked up after May 8th will incur a \$10.00 holding fee***

## **SALE EXTRAS**

**Tree Tube Protectors** Protect tree seedlings from harmful animals and create a mini-greenhouse that increases growth potential. 5 feet tall, \$5.00 each (Stake NOT included)

**Terra Sorb** Root dip that absorbs and stores water, releasing it to plant roots for increased survival and growth. \$1.00 per bag.

## **EQUIPMENT FOR RENT**

**Equipment for Rent** The District has a three point hitch tree planter for rent for \$75.00 per day. An aerator is also available. Deposits are required on all equipment. Call the office or Skinner's Garage (906-647-8121) in Pickford for details.

All products are subject to 6% Michigan Sales Tax. Due to the nature of the stock and variables in handling and planting, the Conservation District cannot guarantee survival of plant stock. And is unable to accept returns or offer refunds. It is unlawful for trees, shrubs and other plants purchased to be resold with the roots attached (per P.A. 189 of 1931, as amended). The District is not liable for any direct, indirect, special incidental or consequential damages (included but not limited to economic losses and lost profits) incurred or claimed by the customer.

## APPLE TREES

**2021 Apple Varieties Shared Characteristics:** All apple varieties listed below for the Spring Tree Sale share some common characteristics. Apple trees will reach a height of 12-15' and will spread approximately 12-15' wide. Each has a white bloom and has Medium—large fruit size. Pollination is required (you will need to buy two varieties or plant near an existing apple tree of a different variety for cross pollination) and the trees require full sun. Loamy, well drained soils will yield highest success with a pH Level between 6.0 and 7.0. It will take approximately 2-7 years for the trees to begin bearing fruit.

**Honeycrisp** (*ELMA 111, 5/8" diameter*) Outstanding fresh-eating qualities make this variety a favorite. Fruit is aromatic and sweet with a juicy, crisp texture. Calcium improves fruit quality and helps with growth. Pollination required.

**Honeygold** (*M-7, 11/16" diameter*) Medium to large, yellow apple. Fruit is crisp, juicy and sweet. Excellent for eating as well as cooking. Medium storage life. Similar to Golden 'Delicious', but harder. Ripens in October. Pollination Required.

**Wolf River** (*Std, 11/16" diameter*) An old variety, hardy and long lived. Best known for its large size - up to 5" diameter fruit. Color is pale yellow to green with carmine-red blushes and stripes. Primarily used as a cooking apple. Ripens in October. Pollination required. **(Limited Quantity Available!!)**

**Yellow Newtown** (*EMLA 111, 1/2 diameter*) High quality dessert and processing apple. Selected by early colonists as an export to meet British apple quality standards. Thomas Jefferson planted this variety at Monticello in 1778. Excellent cider apple. Keeps for six months in proper storage. Antique variety, originates in Elmhurst (formerly Newtown), New York, circa 18th century. Cold-hardy. Ripens in late October. Pollination required. **(Limited Quantity Available!!)**

Variety	Fruit Color	Ripens/ Harvest	Taste	Texture	USDA Zone
<b>Honeycrisp</b>	Red	Early September	Mild/Sweet	Crisp	3-6
<b>Honeygold</b>	Yellow	October	Sweet	Crisp	4-7
<b>Wolf River</b>	Red	October	Sweet/Mild	Crisp	3-7
<b>Yellow Newtown</b>	Yellow/ Green	October	Mild/Tart	Firm	4-8

## 2021 APPLE PRICES

Apple Tree Set of 4 (Honeycrisp, Honeygold, Wolf River, Yellow Newtown)	<b>\$80.00</b>
Apple Tree - Individual - Quantities 1-3 (Specify Variety)	<b>\$22.00 each</b>
Apple Tree - Individual - Quantities 4+ (Specify Variety)	<b>\$20.00 each</b>

## CONIFEROUS TREE SEEDLINGS

**Cedar, White** (*Thuja occidentalis*) Small to medium-sized tree growing up to 60 ft. Very slow-growing. Shade tolerant but best in full or partial sun. Prefers moist deep rich organic soil, but will inhabit dry upland sites. Not found in upland acidic soils. Adapted to clay and sand soils. Wood commercially valuable due to its variety of uses. Favorite deer shelter and food. Native.

**Pine, Red** (*Pinus resinosa*) Fast-growing, long-lived tree growing up to 80 feet. Shade-intolerant. Grows best on well-drained sandy loam soil. Intolerant of high water tables. Excellent tree for reforestation on poor sandy sites. Timber tree with distinctive reddish bark. Native.

**Pine, White** (*Pinus strobus*) Long-lived, moderately fast-growing reaching 80-100 feet. Fairly shade-tolerant, seedlings grow best in partial shade. Prefers moist sandy loam soils but will grow on a variety of sites from swamp to dry sand. Tall, straight stemmed, provides cover and food for wildlife. Native.

**Pine, Jack** (*Pinus banksiana*) Small to medium sized tree reaching 55-65 feet. Great habitat for unique wildlife species including endangered Kirtland's warbler and excels in dry, acidic sandy soils or in loamy or thin soils over bedrock. Native.

**Cedar, Red** (*Juniperus virginiana*) Small to medium sized reaching 10-40 feet. Occurs commonly on limestone derived soils. Does best on dry soils in full sun light. Native.

**Spruce, Blue** (*Picea pungens*) A native of the Rocky Mountains, slow-growing, long-lived, medium-sized up to 50 feet. Grows well on almost any upland soil; drought resistant. Root system very shallow on heavy textured or wet soils, exposed trees subject to wind throw. Exotic.

**Spruce, Norway** (*Picea abies*) Moderately fast-growing, long-lived tree reaching 85 feet. Prefers full sun, tolerates some shade. Thrives on rich, acid, moist well-drained soils but will grow on wide variety. Root system shallow on clay or poorly-drained soils. Mature tree has vertically drooping branches and conical spire-topped crowns. Exotic.

**Spruce, White** (*Picea glauca*) Medium to large reaching 80 feet. Shade-tolerant but prefers sun. Clay, sand and loam soils with moisture conditions from moist to dry, best in well-drained sandy loams. Drought resistant. Straight stemmed, narrow crowned. Native.

### 2021 PLUG STOCK & PRICES

**Plug Stock** Seeded in trays, when the plug is extracted, soil is left on the roots for protection during handling and planting. Plug stock tend to have a higher survival rate than bare root stock. 2021 Plug stock available in Yellow Birch, Red Oak, Red Pine, Jack Pine, White Pine, Balsam Fir, Norway Spruce, Tamarack, and White Cedar.

Variety	Size	Qty 25	Qty 50	Qty 100	Qty 500
Tamarack	6-12"	\$32.00	\$60.00	\$120.00	\$420.00
Birch, Yellow	6-12"	\$32.00	\$60.00	\$120.00	\$420.00
Oak, Red	6-12"	\$62.00	\$120.00	\$240.00	\$900.00
White, Cedar	6-12"	\$21.00	\$38.00	\$76.00	\$244.00
Pine, Jack	6-12"	\$17.00	\$30.00	\$60.00	\$180.00
Pine, Red	6-12"	\$20.00	\$36.00	\$72.00	\$228.00
Pine, White	6-12"	\$20.00	\$36.00	\$72.00	\$228.00
Fir, Balsam	6-12"	\$17.00	\$30.00	\$60.00	\$180.00
Spruce, Norway	6-12"	\$20.00	\$36.00	\$72.00	\$228.00

## DECIDUOUS TREES AND SHRUBS

**Lilac, Common** (*Syringa vulgaris*) The common lilac is an old-fashioned, long-lived, and well-loved lilac best known for its fragrant flowers. It is extremely hardy and thrives with little care which make it a lovely shrub for a specimen planting, in masses, screens, hedges, or mixed in shrub borders. The May blooming flowers are typically purple to lilac. Exotic

**Walnut, Black** (*Juglans nigra*) Quick growing tree in ideal conditions up to 70-100 ft. Self pollinating. Great wildlife tree for all types of animals. Roots produce toxin not suitable for sensitive species of plants.

**Hazelnut, American** (*Corylus americana*) American hazelnut is a small tree with an edible nut. It is a medium to fast growing species, that suckers moderately, eventually producing a multi-stemmed, clump appearance. American Hazelnut grows as a strong multi-stemmed shrub, with their edible nuts maturing in September-October. It is planted by wildlife enthusiasts to attract and keep game in an area. The nuts produced by American hazelnut are a mast of squirrels, deer, turkey, woodpeckers, pheasants and other animals. The male catkins are a food staple of ruffed grouse throughout the winter. Native

**Winterberry, Holly** (*Ilex verticillata*) Winterberry (*Ilex verticillata*), also known as Michigan Holly, is primarily a wetland shrub. It can reach up to 12 feet in height. It prefers wet to moist soil with very poor to moderate drainage. It is salt sensitive. Winterberry transplants well and is fairly resistant to disease and insects. It is also resistant to compact soils. The berries have a high wildlife value for waterfowl and songbirds, but are poisonous to humans. Winterberry needs both male and female plants for berries. Native

**Plum, American** (*Prunus americana*) American Plum has white flowers in spring. The roots are shallow, widely spread, and send up suckers. Development of suckers from the root system makes American plum effective in stabilizing stream banks and gullies. It will tolerate several days of flooding. The branches are thorny. The fruits are about 1 inch in diameter. The American plum is used for both ornamental and culinary purposes. The sour and sweet fruit is eaten fresh and is made into jellies, jam and wine. Native

**Elderberry, Black** (*Sambucus canadensis*) The Elderberry has oblong to oval leaves that turn greenish-yellow in the fall. White, fragrant flowers which can be washed, shaken dry, stripped from stems and beaten into batters for pancakes, waffles and muffins. Berries are small, purple-black color, and have a pleasant taste. The berries ripen in late July through September. An easy way to improve the flavor of mature elderberries is to dry them in the sun or oven. The juice is often used for making wines and jellies. Mix elderberries with apples to make an outstanding jelly. Two year old shoots will produce fruit, which persists into early fall. Native

**Highbush Cranberry** (*Viburnum trilobum*) Attractive shrub up to 15 feet that will tolerate a high degree of shade once established. Tolerates a broad range of soils, including wet clay. Prefers moist site in the open or partial shade. Produces handsome clusters of white flowers. Bright scarlet berries are winter food for ruffed grouse. Native.

**Ninebark** (*Physocarpus opulifolius*) Shade intolerant, spreading shrub up to 10 feet. Pink to white flowers appear in June & July. Fruit attracts wildlife, remains on branches throughout winter. Along stream banks, the branches provide high quality aquatic cover. Great for borders and screens, transplants easily. Native.

**Maple, Red** (*Acer rubrum*) Fast-growing and moderately long-lived tree reaching heights of 70 ft. Shade tolerant. Found in all sorts of woods, prefers wet to moist poorly-drained sandy or loam soil. Well named tree as the flowers, young fruit and autumn foliage are a brilliant red. Often planted as a shade tree. Native.

**Maple, Sugar** (*Acer saccharum*) Hard maple. Valued for its wood and also as a shade and ornamental tree. Sap is a source for maple sugar. Grows best on rich moist upland soils but will adapt to poorer, drier sites. Slow-growing and long-lived. Reaches heights of 90 feet. Native.

**Serviceberry** (*Amelanchier arborea*) Also known as Juneberry, 15-25 feet. White flowers appear before leaves. Young leaves are covered with soft, woolly hairs that disappear as leaf matures. Small, edible berries are reddish purple and the leaves may turn wine-red in fall. Prefers moist, well-drained, acid soils and is shade tolerant. Native.

## DECIDUOUS TREES AND SHRUBS

**Dogwood, Red Osier** (*Cornus sericea*) Multi-stemmed spreading shrub up to 9 feet. Dark green foliage turns purple in the fall. Twigs turn red in winter. Thrives in wet soils. White flowers in June provide berries in fall. Wildlife food and habitat. Native.

**Eastern Redbud** (*Cercis Canadensis* L.) Beautiful tree reaching 15-30 feet tall and spreading 15-25 feet. Deer enjoy browsing twigs during spring and summer and its flowers provide nectar for hummingbirds and pollen for honeybees. Other wildlife also take advantage of the buds, bark, and seed. Native.

**Crabapple, Magenta** (*Malus* sp.) Very showy tree with magenta colored flowers in the spring. Grows up to 30 feet tall in a round shape. Apples are approximately 1/2 in. diameter and normally ripen in October. Wildlife and pollinator species, Introduced.

**Crabapple, Sweet** (*Malus* sp.) Small tree is quite attractive during spring when its relatively large flowers are in bloom. Wildlife use for this tree include food and nesting. Fruit is smooth, waxy, greenish-yellow fruits. Fruit is slightly juicy and sour and can be made into preserves and cider.

**Chokeberry** (*Aronia melanocarpa*) Elliptical, fine toothed leaves 2 to 5 inches long. Turns rich red and orange in autumn. Holds its fruit into winter. Spreads readily by suckering. Edible fruit. Chokeberries can be canned and make healthy fruit drinks. The fruit and buds are a favorite food of the ruffed grouse. The fruit is also prized by turkey, bobwhite, pheasant, cedar waxwing, and many others.

**Staghorn Sumac** (*Rhus typhina*) The stag-horn sumac is a 15-30 ft., colony-forming, deciduous shrub with crooked, leaning trunks, picturesque branches and velvety twigs. Large, bright-green, pinnately-compound leaves become extremely colorful in early fall. On female plants, yellow-green flowers are followed by fuzzy, bright red berries in erect, pyramidal clusters which persist throughout winter. Staghorn Sumac reaches tree size more often than related species and commonly forms thickets. In winter, the bare, widely forking, stout, hairy twigs resemble deer antlers in velvet, hence the alternate common name. \*NEW

**Blueberry, Blue Gold** (*Vaccinium corymbosum*) Bluegold blueberry is a mid-season variety that is highly productive, with superior quality berries for midseason. Fruit ripening is concentrated, with harvesting in 1 or 2 picks. The plant grows compact, spreading somewhat, is a great addition to any landscape. The mature height is 4-6', with yellow fall foliage. \*NEW

**Raspberry, Nova** (*Rubus idaeus* var.) Nova was released from the Nova Scotia breeding program in 1981 and is still one of the highest quality raspberries you can grow. Adaptable to all climates and can be used as a summer-bearer in the far north—Grow as a fall-bearer in the deep south! For areas in between Nova produces 2 crops of large, attractive, firm berries with excellent flavor. Zones 3-8.

**Choke Cherry** (*Prunus virginiana* L.) A large, deciduous shrub or small understory tree, choke cherry grows 20-30 ft. tall and often forms thickets. Dense clusters of white flowers are followed by red fruit ripening to dark purple from August to September. Berries can be made into jellies. Native

**Pee Gee Hydrangea** (*Hydrangea paniculate*) Large, sometimes giant white flower heads reaching 6 to 18 inches long can turn pinkish with age. In the right conditions. Fast-growing shrub that can reach 25 feet tall. One of the most cold-hardy species. It may be grown as a single-stemmed tree specimen or as a multi-stemmed shrub. \*NEW

**Wild Grape** (*Vitis riparia*) Wild grape is a high climbing, woody vine that grows up to 60' to 100 long in its natural setting. Fast growth rate. Will grow well in shady areas, but for maximum fruit yields, prefers sun. Wild grape is quite hardy, though intermittent frosts can reduce fruit yields. Great wildlife species. Native. \*NEW

**Trumpet Vine** (*Campsis radicans*) A native North American ornamental vine. Orange flowers from mid to late summer. Very attractive species for butterflies and hummingbirds. Can be a very aggressive grower, suckering up from the root system when trimmed down. Native. \*NEW

**Red Oak** (*Quercus rubra*) Moderately fast-growing large tree that thrives on rich moist soils but also grows on sandy sites. Long-lived, it reaches heights of 70 feet and does best in full sun or light shade. Desirable street and lawn tree as it is tolerant of salt. Acorns taken by grouse, squirrels, deer and other wildlife. Native.

**White Oak** (*Quercus alba*) Slow-growing large tree that reaches 90 feet. Tolerates most soils except very wet sites. Acorns a favorite of both birds and animals. Valuable timber/wildlife tree. Native.

**Mt Ash American** (*Sorbus aucuparia*) Fast-growing to 40 feet. Beautiful white spring flowers. Bright reddish-orange berries in fall attract wildlife. Grows best in rich moist soils of river banks and swamp borders and in rocky forest areas. Host for Swallowtail butterflies. Exotic.

# 2021 Spring Plant Sale

## Native Plants/Shrubs

***\*Please Note:** The Spring Plant Sale is separate from the Spring Tree Sale. Please use the Plant Sale order form for the Spring Plant Sale.*

## 2021 PLANT SALE ORDERING INSTRUCTIONS

**Online orders preferred** or Complete all parts of the Order Form and return to the District Office with **full payment** on or before **May 25th, 2021 at 4:30 PM** to reserve plants. Orders are filled on a first come, first serve basis. Order early to ensure quantity availability. **No Cash or in person orders in 2021**

### **Pick up Date and Time**

***Sault Ste. Marie ONLY***

***Friday, June 4th, 2021***

***10:00 AM - 5:30 PM***

***Conservation District Office***

***2847 Ashmun St. Sault Ste Marie, MI 49783***

*Late Pick-ups will be charged a \$10.00 holding fee. Late pick-up can not be stored in a temperature controlled area, therefore health of the plant can not be guaranteed.*

### **2021 Native Plant Seed Mixes**

**All mixes include non- invasive plant species that grow in the Midwest region. Hardy in Zones 2 –6**  
**Each Seed Packet will plant approximately 25 sq. Ft. or a 5ft. X 5ft. Area. Bulk Quantities Available**

Native Midwest Wildflower Seed Mix	Native Midwest Wildflower Seed Mix contains 21 wildflowers, including Prairie Aster, Blazing Star, Butterfly Weed and more, that are native to the Midwest. Planting native varieties helps provide local habitat for the pollinators in your area. With both annuals and perennials, this mixture will provide color in the first year and for years after. Plant in IL, IN, IA, KS, KY, MI, MN, MO, NE, OH, WI and ON for best results. All of the seed we offer at American Meadows is non-GMO, neonicotinoid-free and guaranteed to grow	\$5.00/ packet
All Perennial Wildflower Seed Mix	Containing 19 hardy species, the All Perennial Wildflower Seed mix is a beautiful way to bring lasting color to any landscape in zones 1-8. With 15 biennial and perennial wildflowers like Sweet William, Foxglove, Blue Flax and Blazing Star, this mix is designed to build blooms and increase color as the years pass. Including 4 annual varieties to mark your planting area and provide color in the early years, this mix contains only 100% Pure, non-GMO & Neonicotinoid-free seeds	\$5.00/ packet
Monarch Butterfly Wildflower Seed Mix	The Monarch Butterfly Wildflower Mix is an easy-to-grow compilation of 27 wildflowers that will thrive in any sunny location throughout the US. Including 4 different types of Milkweed to ensure Monarchs have plenty of host plants to lay their eggs on, this mix also contains a variety of nectar-rich wildflowers for energizing monarch populations before they migrate. A blend of annuals and perennials provide early and lasting color. This is your go-to mixture for creating an official Monarch Waystation or simply helping out the local pollinators in your area	\$5.00/ packet
Perennial Lupine Seeds	A field of Lupine is an amazing sight, with spiky blooms of saturated indigo-blue that last from late spring to summer. Combine them with later-blooming flowers (like Shasta Daisy and Rudbeckia) for an extended season of color. Growing to be about 12-36" tall, Lupine is a great choice for the front of the meadow or garden bed. Extremely easy to grow and deer resistant, this perennial flower blooms year after year. Seeds are 100% pure, non-GMO, neonicotinoid-free and guaranteed to grow.	\$5.00/ packet
Wet Meadow Wildflower Seed Mix	Our new Wet Area Wildflower Seed Mix is the perfect mix of colorful wildflowers and textural grasses for wet soil. A dozen perennial wildflowers, including favorites such as Aster, Milkweed, Liatris, Helonium, Joe Pye Weed, and more will provide flowers all season long to attract butterflies and other pollinators. These wildflowers are complemented by a range of perennial grasses that provide lush green foliage and interesting textures from small flowers and seed heads. While most wildflowers do best with well-draining soil, our Wet Area Mix is specially formulated to succeed in meadows or gardens near water features and streams.	\$5.00/ packet
Midwest Wildflower Seed Mix	The Midwest Wildflower Seed Mix is comprised of 28 different wildflower species, all perfect for planting in the Heartland of the USA. Designed to provide nonstop season-long color, annuals like Plains Coreopsis and Sulphur Cosmos burst into bloom their very first summer, while perennial varieties like Purple Prairie Clover and Black Eyed Susan deliver color for many years, starting in their second season. Contains 100% Pure, non-GMO, neonicotinoid-free seeds best for planting in: IL, IN, IA, KS, KY, MI, MN, MO, NE, OH, WI and Ontario.	\$5.00/ packet
